...about COR-skills project

✚ What is COR-skills?

COR-skills is an EU funded project under ERASMUS+ programme entitled "Collaborative learning for enhancing practical skills for patient-focussed interventions in gait rehabilitation after orthopedic surgery"

The project starts on 01 December 2015 and will finish on 30 November 2017.

✚ What are our OBJECTIVES ?

- ✚ development and implementation of innovative practices (open resources) in orthopedic and rehabilitation vocational training
- ✚ improvement of basic skills in the field of orthopedy and rehabilitation (assesment, decision, treatment protocols in different pathologies)
- ✚ development of new skills as requested by the labour market - computerized gait analysis
- ✚ development of transversal skills in the field of language, ICT , team work, decision.

✚ Who are our targeted groups?

- ✚ Medical professionals involved in orthopedia and rehabilitation – specialists, residents, kinesitherapists, physiotherapists, nurses, intensive care professionals.
- ✚ Managers /staff in the medical educational system, vocational training organizations and other training providers, universities, colleges and other providers of medical education, public and private Health Institutions , professional associations in the field
- ✚ Patients of orthopedic surgeries and rehabilitation

Project financed by European Commission under the Erasmus + programme, KA2

This document reflects only the author's view and that the NA and the Commission are not responsible for any use that may be made of the information it contains.

What are COR-skills outputs?

- ✚ O1. Reports and research studies
 - Report for the current state of art in the field of protocols for orthopedic surgical procedures and rehabilitation protocols after surgery
 - National reports in participant countries
 - Transnational report
- ✚ O2. Guideliness of operational standards in lower limb orthopedic surgery and rehabilitation
- ✚ O3. e-learning platform
- ✚ O4. Trainer s transversal kit – orthopedic & rehabilitation

✚ Who is going to develop all these outputs?

We are a consortium of 7 partners from different parts of Europe with an international specialists balance (medical, educational, technological). The consortium is formed by 2 higher education institutions, a research center experienced in education and medical services multimedia software, 4 hospitals and a training association with a broad experience on wide range of learners. The project is coordinated by the Clinical Emergency Hospital Bucharest, Romania.

✚ So, in simple words, what we intend to do?

We intend to develop an interdisciplinary on-line platform with specific learning tools and content, supporting participants in acquisition of skills in the field of orthopedy and rehabilitation.

Our e-learning platform will include guideliness for standard protocols in orthopedic surgery and rehabilitation and a large repository of case studies. This will function as an interactive multimedia database system containing full reports on patients receiving orthopedic/rehabilitation treatment - real clinical case studies using digital imaging (Ultrasound, Magnetic Resonance Imaging, Tomography).

Innovation consist in enhancement of case studies with gait analysis as part of the treatment decision-making in patients with complex walking problems.

As long as the project develops we will keep you informed about our outputs and how to benefit of them!

✚ You also could be interested in our MULTIPLIER EVENTS....

What is a multiplier event?

- **An event that is organised to share the intellectual outputs of a project with a wider audience.**
- **These events aim to increase the interest of direct and indirect target group about our project**

During COR-skills project we have 5 multiplier events

- ✚ E1- National Dissemination Event for Presentation of Project and Research Results, June 2016, Bucharest, Romania
- ✚ E2 - National Dissemination Event for presentation of guidelines of standard protocols in lower limb orthopedic surgery and rehabilitation, October 2016, Sofia, Bulgaria
- ✚ E3- Thematic workshops on the new vocational training programs, April 2017, Turkey
- ✚ E4- International Exploitation Conference presenting final project outputs, November 2017, Bucharest, Romania

You can participate to these events without any fee and benefit of our project results - presentation of results, work shops, distribution of project materials.

✚ **Why should you be interested in our courses?**

Our project provides FREE acces to:

- a more attractive training programme, in line with individuals' and labour market needs
- an innovative guideline on fundamental surgical and rehabilitation protocols for the lower limb pathologies with correspondant videos for each procedure
- an innovative multimedia case studies database
- on line ACCREDITED courses in medical education
 - validation of training by CME credits
- practical skills development in a simulated environment. Interactivity allows trainees to test their knowledge and provides immediate feedback using images and cases that they could encounter in clinical practice. This will function as a virtual medical environment, similar with the work place.
- training for new technologies requested by labour market- training medical professionals for computerized gait analysis.

All materials will be available in English, Romanian, Bulgarian and Turkish language.

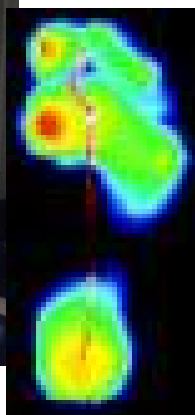

How can you reach us?

- ❖ If you want to participate as trainees in our project please consult our website. We will inform you with 2 month prior to the start up of the training about registration and its requirements.
- ❖ If you are interested in our developed materials and oncoming events please consult our website. We will permanently inform you with 1 month prior to the start up of the multiplication events, registration and requirements for participation.

In order to be informed you can also subscribe to our newsletters on COR-skills web site.

Cor-skills website will be available soon!
Until then, for any question please contact by the e-mail

INFO

Project implementation stage

The first COR-skills kick off meeting on 11.12.2015, in Bucharest has been hosted by the Clinical Emergency Hospital Bucuresti, Romania.

- We got to know each other as people, professionals, and institutions
- We provided full information about all aspects of the project
- We create transparency and build trust in the partnership, confirm roles and tasks.
- We planned the first project phase in detail and start up COR-skills project.
